

# East Francisco Boulevard / Phase II Construction

Project Number: 2020

## LOCATION

East Francisco Boulevard/Grand Avenue between Second Street and Vivian Way

## COST

\$1,500,000 (estimated)

## FUNDING SOURCES

NTPP \$1,500,000

## COMPLETION DATE

December, 2013 (projected)

## PROJECT DESCRIPTION

The project will construct an eight-to-ten foot sidewalk/multi-use path on the north side of East Francisco Boulevard between Vivian Way and Second Street, replacing the existing narrow sidewalk and relocating obstructions including lampposts and fire hydrants out of the way. Additionally, the Grand Avenue bridge will be widened to accommodate the new sidewalk/multi-use facility. This project is the second phase of a design project which also constructed the first phase of improvements, between Bellam Boulevard and Vivian Way.

## POINTS OF INTEREST

This corridor is the primary access for Canal residents to get to Montecito shopping center, the San Rafael Transit Center, and downtown San Rafael. Due to the traffic volumes, many cyclists ride on the existing, narrow sidewalk in this corridor, creating conflicts with the many pedestrians that also travel through this area.

## STATUS

In design.

Revised October, 2012

Tight clearance and heavy traffic encourage cycling on the narrow sidewalk.

As the primary connection between downtown and the Canal, congestion on the sidewalk by pedestrians and cyclists is common.

Lamp posts, hydrants, trees and other objects further reduce the usable sidewalk width.
